Nuclear Family is a tragicomic novel in letters that explores the complexities of family relationships, the secrets we keep from each other, and the search for meaning in life. Told through a series of letters between family members, the novel offers a unique and intimate perspective on the human condition.

The novel begins with a letter from a young woman named Alice to her estranged father. Alice has been estranged from her father for many years, and she writes to him in an attempt to reconnect. In her letter, Alice reveals that she is pregnant and that she is not sure who the father is. She also tells her father that she is struggling to find her place in life and that she is looking for guidance.

Alice's father responds to her letter with a mixture of love and concern. He tells Alice that he is happy to hear from her and that he will always be there

for her. He also encourages Alice to find her own path in life and to not be afraid to make mistakes.

As the novel progresses, we learn more about Alice and her family. We learn that Alice's mother died when she was young and that she has been raised by her father and stepmother. We also learn that Alice has a younger brother who is struggling with addiction. Through the letters, we see how Alice's family is dealing with the challenges of life and how they are trying to find their own happiness.

Nuclear Family is a beautifully written and emotionally resonant novel. The characters are well-developed and believable, and the story is both heartbreaking and heartwarming. The novel is a reminder that family is not always easy, but it is always worth fighting for.
