## History of Piano Vocal Selections

The concept of piano vocal selections originated in the early 19th century, coinciding with the rise of the piano as a popular household instrument. As domestic music-making became more widespread, there was a growing demand for sheet music that included both piano accompaniment and

vocal parts. This led to the publication of piano vocal selections for popular operas, oratorios, and other large-scale vocal works.

In the 20th century, piano vocal selections expanded to include a wider range of musical genres, including musical theatre, choral music, and popular songs. Today, PVSPVG are an essential part of the music publishing industry, with new selections being released regularly to meet the needs of performers and educators.
